

CS 4342 - Machine Learning
Homework - 3 Softmax regression and Titanic Disaster Challenge

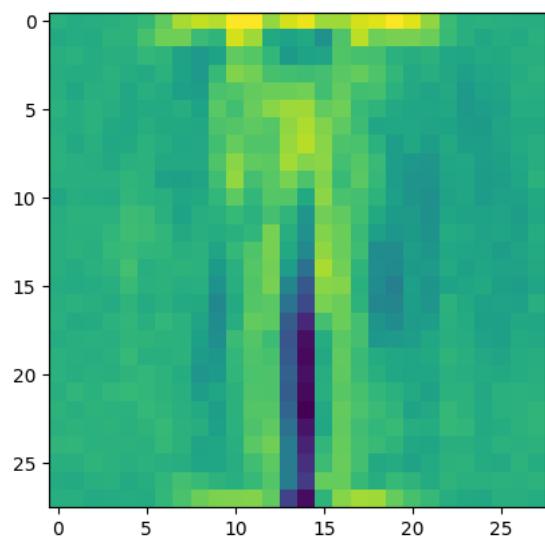

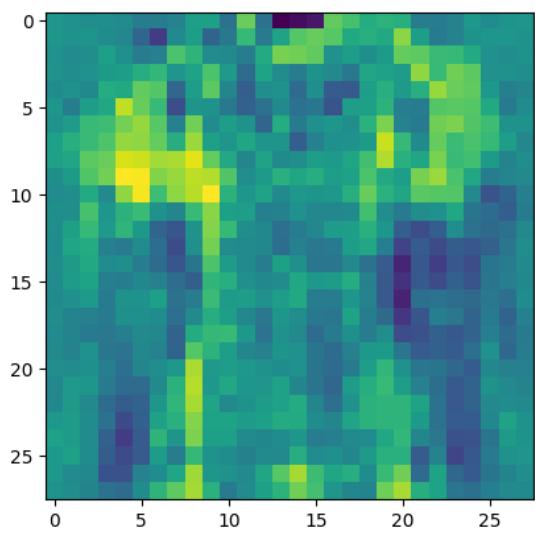

- a. Training Loss during the last twenty mini-batches of the last epoch:

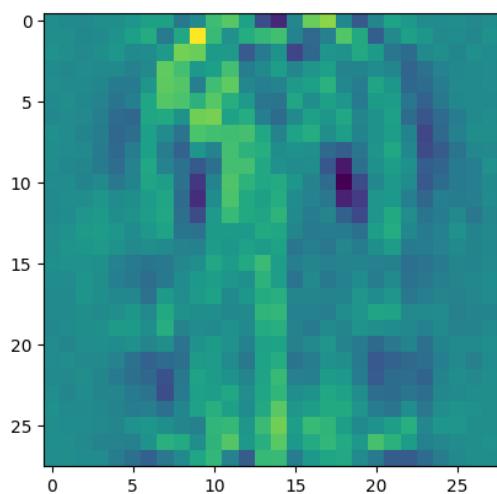

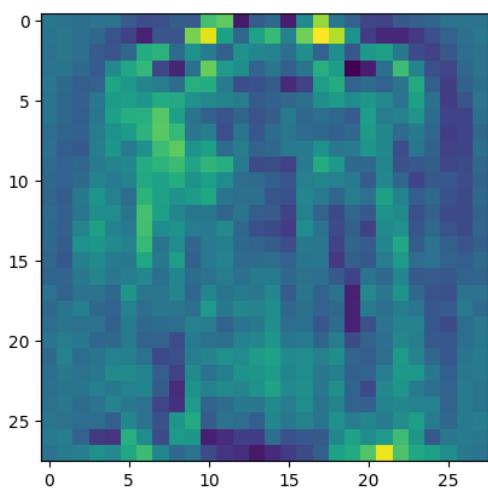

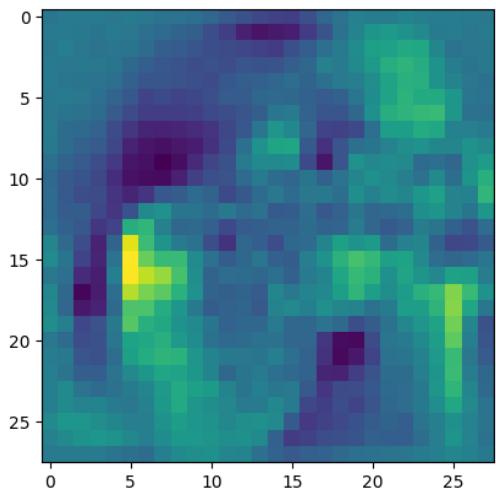

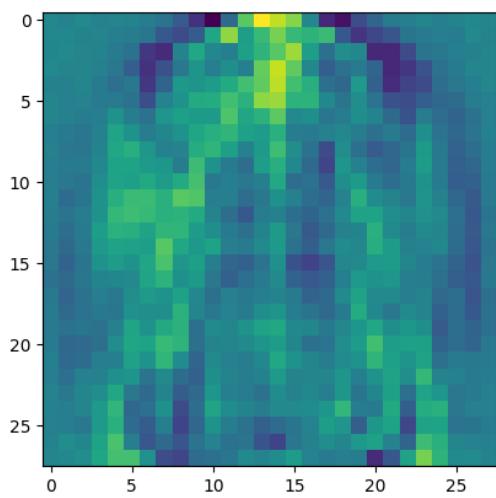

- b. CE loss and PC accuracy on the Test set (includes PC for the training data as well)

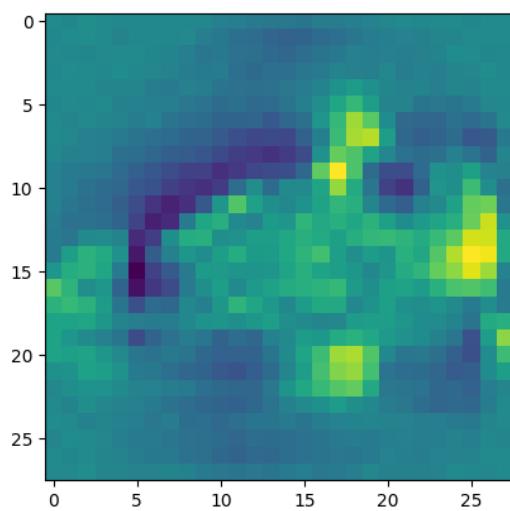

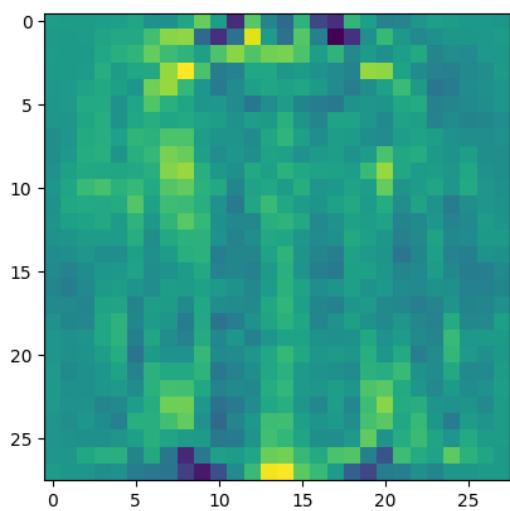

```
Training Accuracy (fPC): 0.86
Testing Accuracy (fPC): 0.842
Testing Loss (fCE): 0.45215715385915384
```

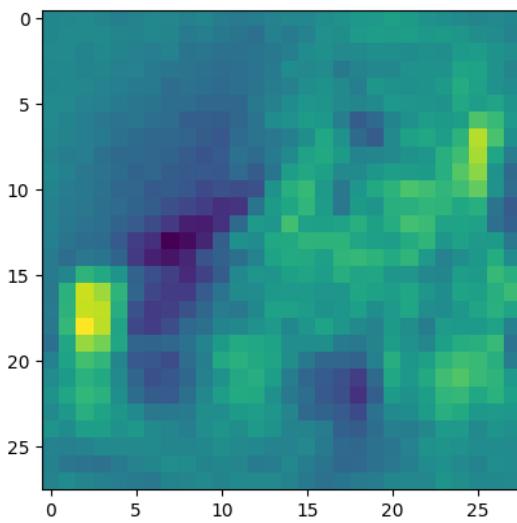

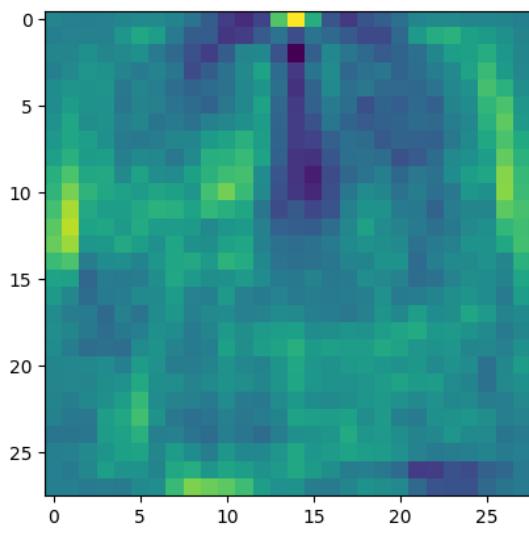

- c. Visualizing trained weights:

Accuracy of the Softmax Regression Model on the Titanic test data: 0.77272
